Spotlight Project *Viamonte of Walnut Creek*

Walnut Creek, CA

With senior living facilities becoming more and more prominent in new construction, this AGS project creates a signature look for an architecturally distinctive living complex. Our horizontal aluminum sunshades utilize rectangular tubes to support perforated panels and a custom

Bullnose Fascia to complete the striking visual profile. These sunshades articulate window openings, accentuate the varied and unique facades on the building, all while providing needed shading from the intense California sun.

Join Us In Welcoming...

Jason Coppe | AGS Estimating Team

MEET THE NEWEST ADDITION TO OUR AGS

ESTIMATING TEAM, JASON COPPE. Jason comes to us from Walsh Construction where he was a member of the pre construction estimating team. His position at Walsh taught him to efficiently navigate blueprints for calculating bids. Jason really enjoys seeing a project from it's conceptual stage to completion. He has a degree in civil engineering from Marquette University, Milwaukee, WI. His passion for construction was passed on by his grandfather who emigrated here from Italy many years ago. **Welcome Jason!**

Spotlight Employee

Sherricka Smith | Drafter

AGS: How did you come about your position as drafter at AGS?

SHERRICKA: Well, it was a cold winter night in the deep dark woods (LOL) ... I came across the job listing online and did some research on AGS to see what type of drafting would be required. To my surprise, I had already done similar work when I worked for a competitor. I applied and got a response sooner than I expected.

AGS: What do you like best about your job?

SHERRICKA: I enjoy seeing the finished product after it has been installed. It makes it "real" at that point. What was once 2D is now 3D and tangible. I also like to show family and friends the jobs that I have drafted that are installed and completed.

AGS: What is your personality at home as opposed to your work self?

SHERRICKA: This is me all the time.

AGS: What is your son Liam like and what does he enjoy?

SHERRICKA: He loves Paw Patrol. I would say that is his first love, then comes the "raarrs" (Dinosaurs). When he's not wrapped up in his toys, he loves to either help me cook or sit on the counter and watch.

AGS: What's your favorite mommy/son thing to do?

SHERRICKA: I would say cooking or baking. I love to see his face light up when an egg is cracked or when the blender gets going and he takes off running.

"I ENJOY SEEING THE FINISHED PRODUCT AFTER IT HAS BEEN INSTALLED. WHAT WAS ONCE 2D IS NOW

- Sherricka Smith **3D & TANGIBLE"**

Carolina State University Plant Science Building - Raleigh, NC Drafted by Sherricka Smith

AGS: The perfect weekend for you would be _____ ?

SHERRICKA: To do absolutely nothing but relax, but there is always something that needs to be done and Liam keeps me going regardless of the day.

AGS: What is your favorite AGS project?

SHERRICKA: I don't think I have a favorite project. I enjoy seeing the finished project regardless of the job.

Here's something **A LITTLE DIFFERENT**

PERFORATED AIRFOIL INFILL

When you're thinking of **#aluminumsunshades**, this is probably not your run of the mill extrusion. In fact, it's not an extrusion at all. Bring on your challenging designs and AGS Inc. will figure out a way to help bring them to life. This dog bone design allows for dual vertical mounting of infill with an offset that adds interest and added sun screening.

INTRODUCING...

THE MAC 440

OUR NEWEST ADDITION TO THE AGS FABRICATION MACHINERY TEAM

THE "MAC DADDY" is able to take extra-long lengths of profile and cut them down to size, all while drilling holes necessary for final assembly of curtainwall and storefront. This efficient process makes for lighter work and less handling of parts. Our Storefront/Curtainwall Fabrication Service is offered on all major manufacturer's systems. Customers furnish fabrication drawings and materials while AGS takes care of all cutting, drilling, milling, notching, and assembly.

Watch the video of the MAC in action by clicking the link below.
