

AGS helped this library
give new meaning to:

Read between the lines.

A 27% improvement in energy efficiency earned the Tenley Library LEED™ Gold Certification. Many of the building's unique architectural elements had sustainability requirements.

The “fins” on the building were intended to mimic the pages of a book. Our solution not only added this striking architectural element, it allowed natural light for reading spaces while serving as energy saving, light-filtering sunscreens.

Let us shed some light on sunshade solutions for your next project.
