

AGS delivered design and performance to this center for innovation.

Supporting design and achieving energy goals.

The Flagship Business Enterprise Center for Purdue Polytechnic combines a student innovation area with an advanced manufacturing space for local manufacturers.

This state-of-the-art, high-tech facility utilizes AGS sunshades to complement the modern, industrial design. The tri-tone gray panels of the AGS sunshades increase efficiency and dramatically frame a large gold box to form a striking focal point for front of the building.

Let us help add design and performance to your next project with our unique sunshade solutions. Call **708/479.9458** or visit **agsshade.com**
